

Critical Infrastructure · governed end to end

# Secure Decision-Support Agents

Support operators without giving AI unsafe authority.

## THE PROBLEM

High-risk environments cannot allow broad autonomous action without strict control.

## WHAT AXERON DOES

Axeron designs agents with read-only, advise, act-with-approval, or autonomous modes. Continuum enforces gates, logs, and rollback controls.

## THE VALUE

Useful AI support without uncontrolled automation, better trust, and safer adoption path.

## HOW IT RUNS

- 01 Discover current process
- 02 Prepare data and controls
- 03 Build governed AI workflow
- 04 Deploy inside chosen environment
- 05 Monitor value and improve

## DIRECTIONAL IMPACT

Enables staged adoption; reduces security/governance friction for high-risk agent workflows.

Process Discovery

Continuum

TeamAI

Impact figures are directional, not a guarantee – Axeron sizes them against your data and workflow in a scoping engagement. Deployed inside infrastructure you control: cloud, private, on-prem, or air-gapped.
