

Government · governed end to end

Agency Workflow Digitization

Turn undocumented work into digital process maps and AI-ready workflows.

THE PROBLEM

Many agencies operate through informal knowledge: spreadsheets, email chains, manual approvals, and employee memory. That makes modernization risky.

WHAT AXERON DOES

Process Discovery interviews employees, analyzes forms and documents, maps current-state workflows, identifies bottlenecks, and designs AI-enabled future-state processes.

THE VALUE

Clear modernization roadmap, better process ownership, lower transformation risk, and prioritized use cases tied to measurable outcomes.

HOW IT RUNS

- 01 Discover current process
- 02 Prepare data and controls
- 03 Build governed AI workflow
- 04 Deploy inside chosen environment
- 05 Monitor value and improve

DIRECTIONAL IMPACT

2–6 weeks to map a priority workflow; 10–30% efficiency opportunity commonly found in manual routing, rework, and document-prep steps.

Process Discovery

Data & Model Platform

TeamAI

Impact figures are directional, not a guarantee – Axeron sizes them against your data and workflow in a scoping engagement. Deployed inside infrastructure you control: cloud, private, on-prem, or air-gapped.
