

Manufacturing · governed end to end

# Plant Operations Knowledge Assistant

Capture tribal knowledge before it walks out the door.

## THE PROBLEM

Experienced operators know how things really work, but that knowledge is rarely documented well.

## WHAT AXERON DOES

Process Discovery interviews employees and converts operational knowledge into secure assistants connected to approved procedures and system data.

## THE VALUE

Lower dependency on a few experts, faster troubleshooting, and stronger workforce continuity.

## HOW IT RUNS

- 01 Discover current process
- 02 Prepare data and controls
- 03 Build governed AI workflow
- 04 Deploy inside chosen environment
- 05 Monitor value and improve

## DIRECTIONAL IMPACT

20–40% faster answer retrieval for known operational questions; valuable for aging workforce and shift continuity.

## AXERON STACK

Impact figures are directional, not a guarantee – Axeron sizes them against your data and workflow in a scoping engagement. Deployed inside infrastructure you control: cloud, private, on-prem, or air-gapped.
