

Manufacturing · governed end to end

# Procurement Automation

Reduce manual RFQ, quote comparison, and supplier follow-up work.

## THE PROBLEM

Manufacturing procurement teams handle specs, RFQs, quotes, lead times, price changes, and supplier exceptions manually.

## WHAT AXERON DOES

Axeron agents prepare RFQs, compare quotes, flag deviations, summarize supplier responses, and route approvals.

## THE VALUE

Faster buying cycles, better quote comparison, lower manual effort, and improved price visibility.

## HOW IT RUNS

- 01 Discover current process
- 02 Prepare data and controls
- 03 Build governed AI workflow
- 04 Deploy inside chosen environment
- 05 Monitor value and improve

## DIRECTIONAL IMPACT

20–45% faster quote-comparison preparation; savings depend on spend category and supplier complexity.

## AXERON STACK

Impact figures are directional, not a guarantee – Axeron sizes them against your data and workflow in a scoping engagement. Deployed inside infrastructure you control: cloud, private, on-prem, or air-gapped.
